

PERSONAL DEVELOPMENT PLAN

Name : Harshitha M

Reg.No : 2511021061770

Course : B.Tech in Biotechnology

Year : 1

1. Current Situation

I am currently pursuing my 1st semester in Biotechnology Engineering.

I am learning the basics of engineering subjects and adapting to college life.

I want to build a strong academic foundation from the beginning.

2. Short-Term Goals

Score a good CGPA in the 1st semester exams.

Improve my study habits and time management

Gain a better understanding of core subjects like Biology, Chemistry, and Mathematics.

Develop good communication and teamwork skills.

3. Long-Term Goals

Get a good placement job through campus interviews.

Become skilled in biotechnology techniques and research tools.

Participate in workshops, internships, and projects to gain experience.

Build a strong resume and professional network.

4. Skills to Develop

Laboratory and research skills
Presentation and communication skills
Computer and analytical skills
Leadership and problem-solving abilities

5. Action Plan

Attend all classes and take proper notes.
Revise daily and focus more on weak subjects.
Join seminars or student clubs related to biotechnology.
Seek guidance from teachers and seniors.
Use online platforms (like NPTEL, YouTube, Coursera) to learn extra topics.

6. Progress Check

Track my CGPA and progress after every internal and final exam
Take feedback from teachers to improve performance.
Update this PDP every semester based on achievements and new goals.

Whats appStrength

- * Launched many years ago
- * has privacy
- * has channels to connect with communities

Weakness

- * No automatic backup

Opportunities

- * communication benefit
- * talk & see the person from long distance.

Threat

sandesh, Arattai apps.

Strength

- * increased job opportunities abroad
- * involvement in research area.
- * financial stability.
- * job matching with my passion
- * enhance practicality

Weakness

- * low demand in India
- * low salary
- * less demand

Opportunities

- * serve nation with bio-innovations
- * tie up with multinational bio-tech companies.
- * leading honourable life.

Threat

- High scientists, bachelor's Degree in Biotechnology.
- Foreign companies with new innovation

SMART Analysis

S	specific
M	Measurable
A	Achievable
R	Relevant
T	Time-bound.

Short Term goal

Get 95% in Semend examination.

Specific - Specific abt academics.

• need consistent and disciplined study.

• student and faculty are involved.

• This goal is important to boast my self with academics and self confidence.

Measurable - My goal will be achieved by the CGPA I get in my sem result.

Achievable - It is achievable as i have all the required resources.

Relevant - It matter to me.

Time bound - start - from now, end date - nov-dec (sem end examination)

Long Term goal

Get a good and satisfied package in campus placements.

Specific - Get good score in all the sem end examination.

• And also gain hands on practical knowledge.

• me as a student and the organization is involved.

• This goal is very much important to me to gain financial stability and a good fame in society.

Measurable - by getting a good package of job.

Achievable - I have all the resources and comforts necessary to achieve my goal and it still remains possible.

Relevant - My goal is worthwhile and aligns with broader objectives.

Time bound - 4 years start - 2025 end - 2029.
